JOB PRINTING

Such as *Labels, Cards, Tickets, Programmes, Handbills, Posters, Blanks, Pamphlets, &c.,*

Done at this office neatly and expeditiously, on terms adapted to the times.

MASSILLON BUSINESS CARDS.

BANKS.

Union National Bank,
MASSILLON, O,
CLEMENT RUSSELL, President. WM. M'CLYMONDS, Cashier.

First National Bank,
Erie street, Massillon, O. $200,000 Capital. I. STEESE, *Pres.;* S. HUNT, *Cash.*

ATTORNEYS.

F. L. BALDWIN, Attorney-at-Law, *Massillon, Ohio.*—Office in Opera Block. Collections promptly made, and all business carefully attended to.

R. H. FOLGER, Attorney-at-Law, Massillon, O. Office over Reed's store.

ANSON PEASE, Attorney and Counsellor at Law. Office over First National Bank on Erie street.

PHYSICIANS.

M. M. CATLIN, Homeopathist,
Successor to Dr. D. G. Curtis.
Office above Humberger & Son's store; residence, corner of Hill and Oak streets, Massillon, O. 414 tf

Dr. H. GEROULD. Opera House, Erie st., Residence on North street, one door west of M. E. church Massillon, O. Reference, Prof. H. R. Storer, Boston, Mass.

A. METZ, M.D.—Office and residence on North street, Massillon, O. Office hours 7½ a m to 12 m, and 3 p m, to 8 p.m. To secure prompt attention orders for morning visits must be sent in by 9 o'clock, and for afternoon visits by 2 o'clock.

T. J. REED, M.D. Office corner of Main and Hill streets. Office hours 7 to 9 o'clock a.m., 12 to 2, and 6 to 8 o'clock p.m.

A. R. SOWERS, Physician and Surgeon, Canal Fulton, O.

Dr. A. HOUTZ, Physician and Surgeon. Canal Fulton.

Dr. A. W. RIDENOUR, Massillon, Ohio, office on Main street, over F. Hookway's Clothing Store. 330 1y

DRUGGISTS.

JOSEPH WATSON, Druggist, Main street, keeps constantly on hand Oils, Paints, Varnish, Glass, Drugs, Medicines, Brushes and Wall and Window Papers, &c.

EDWARD KACHLER, Druggist and Bookseller, Main street, deals in Books, Drugs & Medicines, Oils, Paints, Varnish, Glass, Perfumery, Patent Medicines, School Books, Wall and Window Papers, Inks, Stationery

DENTISTS.

E. CHIDESTER, Dentist. Office over Humberger & Son's store, Main street. All operations in dentistry warranted, and terms as low as those of any other dentist in Stark or Wayne county. Gutta percha or hard rubber work done in the best style with Hayes' celebrated *High Pressure Vulcanizer.*

A. H. JOHNSTON, Surgeon Dentist. Office over Conrad's hardware store, Main street. Work warranted second to none in Ohio for beauty, comfort and durability—from one to an entire set, on gold, silver, platina or vulcanite base. Charges moderate.

GROCERIES.

H K. DICKEY & CO., Wholesale Grocers & Tobacco Dealers. Sell to the trade only. Exchange Place, Massillon.

H. MORGANTHALER, Jr., & R. BREED, Groceries and Provisions—successors to D. R. Atwater & Co., Main street.

MISCELLANEOUS.

LUMBER
MANUFACTURED TO ORDER,
—Oak, Beech, Maple, Walnut, Elm—
Also Fire Wood always on hand, delivered to all parts of the city.
Leave your orders at my office, Massillon Excelsior Works.-343 JAS. BAYLISS.

Lumber Yard.—M. A. BROWN is prepared to fill bills at *Cleveland prices*, freight added, on short notice. Full stock of Pine Timber and Lumber, Flooring, Siding, Ceiling, Barn Boards, Battens, Shingles and Lath, in short every thing in the lumber line. Opposite Massillon depot.

D. R. ATWATER & CO., Forwarding and commission Merchants, and Dealers in all kinds of country Produce Warehouse in Atwater block, Exchange place.

W. F. RICKS & BRO., Dry Goods Merchants, Massillon, O.

MYERS & WILLISON, Manufacturers of Hubs, Spokes, and Bent Material for Wagons and Carriages. Planing and Matching done to order. North end Erie street.

MASSILLON FURNACE—J. P. Burton, Proprietor—Manufacturer of Foundery Pig Metal, similar in quality and equal in every particular to Scotch Pig. Also, Massillon Coal for sale.

H. FALKE,
Wholesale and Retail Dealer in Dress Silks Millinery, Embroideries, Bonnets, Cloaks, Shawls, Gloves,, Lady's Fancy Goods, Hosiery, &c., Main street, 3 doors above Mill, Massillon, Ohio.

JOHN A. YOUNG, Auctioneer, Is prepared to attend to all calls in his line of business. His terms are easy, and customers will find it to their advantage to secure his services. Inquire at this office. 389-1y

We invite all to call at Kelley & Brown's and see what they have new. No trouble to show goods.

SIMMONS' LIVER Regulator.

THE symptoms of Liver Complaint are uneasiness and pain in the side. Sometimes the pain is in the shoulder, & is mistaken for rheumatism. The stomach is affected with loss of appetite and sickness, bowels in general costive, sometimes alternating with ax The head is troubled with pain, and dull, heavy sensation, considerable loss of memory, accompanied with painful sensation of having left undone something which ought to have been done. Often complaining of weakness, debility, and low spirits Sometimes many of the above symptoms attend the disease, and at other times very few of them; but the liver is generally the organ most involved. Cure the liver with

Dr. Simmons' Liver Regulator,

A preparation of roots and herbs, warranted to be strictly vegetable, and can do no injury to any one. It has been used by hundreds, and known for the last 40 years as one of the most reliable, efficacious and harmless preparations ever offered to the suffering. If taken regularly and persistently it is sure to cure Dyspepsia, Headache, Jaundice, costiveness, sick headache, chronic diarrhœa, affections of the bladder, camp dysentery, affections of the kidneys, fever, nervousness, chills, diseases of the skin, impurity of the blood, melancholy or depression of spirits, heartburn, colic, or pains in the bowels, pain in the head, fever and ague, dropsy, boils, pain in the back, &c. Prepared only by J. H. ZEILIN & CO, Druggists, Macon, Georgia.
And 829 Arch street, Philadelphia, Pa.
For sale by E. KACALER, Massillon, O.
Wholesale by STRONG & ARMSTRONG, 424tf Cleveland, O.
Price, $1; by mail, $1,25.

The only place to find the Gibbs & Co's Plows, Hall & Spead Plows, Jone's Waynesborough Plows and Cultivators, is at the Massillon Hardware Store.
KELLEY & BROWN.

Jas. T. Brady & Co.,
(Successors to Jones & Co,)
Corner Fourth & Wood streets,
PITTSBURGH, PA.,
BANKERS,
Buy and sell all kinds of
Government Securities,
Gold and Silver Coupons.
Six per cent. interest allowed on deposits subject to check.
Money loaned on government bonds. Bonds registered free of charge. 373-1y

LEWIN JARVIS, Justice of the Peace Notary Public, and Conveyancer; also Canal Collector, Massillon, O. Office—Atwater's Block, over Morganthaler & Breed's grocery store, next to the canal. 365

MASSILLON IRON FOUNDRY.
Killinger & CO.,
MANUFACTURERS OF PARLOR, HEATING AND COOKING STOVES.
Plows, Points, Car Wheels, Bells, and Castings Generally.
STATIONARY AND PORTABLE STEAM ENGINES, AND CIRCULAR SAW MILLS.
Prompt attention given to repairing Mills, Engines, and Machinery of all kinds.
IRON BUILDING MATERIAL,
Columns, Caps, Sills, &c., furnished to order.
Office and Foundry, Main st., West of Canal 245-1y

TRADE MARK
THE Earth Closet Company
JOHN HOSKIN, General Agent for Ohio, Western Pennsylvania, &c.
Patent Dry Earth Commodes in Walnut or Ash Cases.
Patent Dry Earth Apparatus for Fixed Closets or Privies, either Pull-up or Self-acting.
The Dry Earth Closet is a successful substitute for the water closet, being cheaper, less liable to get out of order, and positively free from odor. Suitable for dwelling house, sick chamber, merchants' offices, factories, schools, railroad depots, hospitals, prison cells, &c., &c. Call and see them at the Massillon Excelsior Works. 343-1y
Agents wanted in every town.

Those who anticipate building can find Doors, Sash, Blinds, Paints, Oil, Locks, Hinges, and other necessary articles at Kelley & Brown's, Erie street, Massillon, Ohio.

T. R. Richmond,
Dealer in Pine Lumber, Shingles, Lath, dressed Flooring and Siding, Bill Lumber wide and common, Barn Boards, Fencing, Box and Second Pine, which will be disposed of on very reasonable terms. Lumber Yard on Erie st., opposite Tremont House, Massillon, where I will be glad to wait on customers who desire anything in the lumber line.

E. D. DOUSE,
COAL DEALER.
Office West Side Canal Near Gas Works.
Thankful for former liberal patronage would respectfully solicit a continuance of the same. Confident that he can give satisfaction as he delivers none but
CLEAN COAL
from the best mines, at greatly reduced rates
☞ *TERMS:—POSITIVELY CASH.* ☜

A. HARSH,
WHOLESALE DEALER IN
Notions and Fancy Goods,
AND MANUFACTURER OF
Umbrellas and Parasols,
Corner Main and Factory sts, Massillon, O

VOL IX---NO 11 MASSILLON, OHIO, SEPTEMBER 6, 1871. WHOLE NUMBER. 427.

INDEPENDENT.

THE MORAL PURITY OF CHIDREN.

BY H.

The apathy which exists in regard to this subject is astonishing to those who are even partially acquainted with the true condition of the morals of our children; and it is a cause of rejoicing that there are signs of an awakening. The natural modesty of the pure minded has induced a reticence in regard to the evil, and has been the occasion of much of the evil itself.

The extent of moral impurity among children is frightful, and the more frightful because it is not suspected, or at least believed to exist. The The Rev. E. P. Powell, who seems to have won to an unusual degree, the confidence of boys, says that his experience—not his opinion, but his experience—is that, "not one boy of ten is ignorant of the nature of the most destructive vices. Many of them are nearly ruined, physically and morally, before they are even informed of the results of their habits."

This is a most astounding assertion; but I fear the facts, if known, would substantiate it. Comparatively few have any knowledge of the thoughts and acts of children and youth of both sexes in this matter.

When children reach a certain age, there is a natural and commendable desire to know the truth in regard to the relation of the sexes. Their parents are studiously silent upon the subject, and any inquiry by the child is frowned upon by the parents as something improper. The child's curiosity is not stifled, however; on the contrary, it is stimulated by the mystery which seems to shroud the subject, and is often gratified by a recourse to vulgar and vicious companions, who are always willing to display their superior knowledge. The information which should have been conveyed by the parent in the most delicate and judicious manner, accompanied with the proper instruction and warning, is imparted in such a way as to lead the innocent, unsuspecting child into the snare of the wicked As Mr. Powell justly observes: "They are nearly ruined before they are informed of the results of their habits." They are ignorant of these results because they never have been taught Why should they not be ignorant, when so many parents believe, or act as if they believe, that ignorance is virtue? In this case ignorance is vice. The bad habit once formed, the poor child being the slave of the appetite, it is easy to foretell the result.

A few days ago, a number of ladies of our acquaintance visited a noted cyprian to urge her to abandon her terrible trade. She told them her business was supported by their husbands and sons. To convince them of the truth of this statement, she offered them a hiding place in her house from which her visitors might be seen. Some of them accepted and were convinced. Does any one suppose this was the beginning? Does one begin a course of iniquity by taking the last step?

It is the sad mistake of too many Christian parents that they are unwilling to believe in the existence of sin in their own children—especially of such sin. But a moment's reflection should show them that they know nothing of the minds of their children on this subject. They have scrupulously avoided all conversation with them on this subject, either from modesty, or for fear of contaminating their minds; fondly but vainly supposing that their children are in ignorance of these things of which a child cannot remain in ignorance, unless kept in the strictest seclusion, I am sometimes inclined to believe that the two persons most ignorant of the true character of a child are its own father and mother. He easily deceives them because they think they know him perfectly, and they are of course desirous of thinking well of him.

How many gentlemanly, polite boys in the sight of their parents, are known to others to be profane and vicious I have in mind one of these, the pet of his fond mother, a well dressed, well appearing boy of twelve years, who for some time, daily made indecent proposals to girls, and, as he confessed to me was guilty of solitary indulgence. For the latter I blamed him but little. He had not been taught better. And when I kindly explained to him the evil results of such a course, he readily assented to my suggestion that he should reveal to his companions in vice what I had made known to him.

Many are of the opinion that such things are true only or chiefly of the children of the lower classes. My own experience is directly the opposite. All the cases which have come under my own observation, with one exception, have been children of what we call the better class. The rich food, the late hours, the improper books, the dancing and other parties of boys and girls, all have their effect.

What the remedy? Parental instruction and watchfulness. The work must be done at home. It is the duty of the parent to know what his child knows on such subjects, and not take it for granted that he is ignorant of vice because he has not been warned against it, when there is every reason to believe that it is next to impossible for him to remain pure.

Parents, as you value the welfare of your children and your children's children here and hereafter, let not a modest shrinking keep you silent. Such silence makes you guilty of their sin and responsible for their destruction.—Interior.

THE INTERIOR OF THE EARTH.

Among the various papers read before the British Scientific Association, was a report from the Tidal Committee of the society. This paper contained a number of curious and interesting speculations with regard to the degree of elastic yielding which the solid earth experiences under the tide generating influences of the sun and moon. It is quite certain that the solid earth does yield to some degree. It has long been a favorite assumption with geologists that the earth consists of a shell of solid rock from twenty to fifty miles in thickness, enclosing an interior filled with melted material, lava, metals, &c. This hypothsis is now shown to be absolutely untenable because if it were true, the solid crust would yield with almost as much freedom, on account of its thinness and great area, as if it were perfectly liquid. Thus the boundry of the solid earth would rise and fall under the tide generating influences, so as to leave no sensible differences to be marked by the water rising and falling relatively to the solid; showing that if the earth as a whole had an average degree of rigidity equal to that of a glass the tides would be very much diminished from the magnitude which they would possess on a perfectly rigid globe, with water like that of our seas upon it. This consideration the committee reports, makes it probable that the earth has considerable more average rigidity than a globe of glass of the same size. The mathematical calculation shows a somewhat startling result, to the effect that a globe of the same size as the earth if throughout exactly of the same rigidity as a glass on a smaller scale, would yield like an India rubber ball to the tide generating influences, thus leaving very little opportunity for change in the relative heights of water and land. The precise agreement of the actual tidal movement with estimates founded on the supposition of a perfectly rigid globe, renders it probable that the earth is in reality vastly more rigid as a whole than any specimens of surface rock that had been experimented upon in laboratories. Dr. Soule ten years ago, in speaking on this subject, had suggested that probably the great pressure in the interior produced in the material, which might be of the same substance as surface rocks, a greatly increased rigidity in positions at great depths below the surface. This part of the inquiry the committee propose to make a primary object in the calculation next to be taken.

THE SPECTRUM ANALYSIS.

In a recent lecture on the spectrum analysis is applied to the manufacture of steel by the Bessemer process, Prof Rosco gave a table showing that incredibly small traces of different metals might be detected by the spectroscope. Thus one millionth part of a grain of storontia and the same proportion of a grain of lime can readily be detected. Soda, it is stated, is always present in the atmosphere, and all bodies exposed to the air exhibit the yellow soda lime. Traces of soda as small as the one hundred and eighty millionth of a grain can be detected. Lithia for a long time was supposed to occur only in four minerals; but by the spectrum analysis it has been discovered to be one of the most widely distributed elements, existing in almost all rocks, in sea and river water, in the ashes of plants, in milk, in human blood, and in the muscular tissue. The one sixth millionth of a grain of lithia can at once be detected. Cæsium, a new alkaline metal, has, by means of the spectroscope, been discovered in the mineral waters of Baden—thirty tons of the waters yielding one hundred grains of the metal. Its spectrum consists of two bright blue lines.

The census office reports will show that there are 134 cities in the United States having a population each of 10,000 or over. Massachusetts has eleven of these cities. Boston stands fifth in the rank for the whole country, Worcester thirtieth, and Lowell thirty-first. Connecticut has five, New Haven holding the twenty fifth place. New Hampshire has three, Manchester being fifty-fifth. Rhode Island has but one city of over 10,000 inhabitants, and that is Providence, which is the twenty first on the list and the second city in New England. Vermont has only Burlington and that stands well toward the bottom of the list; and is numbered the ninety-fourth. The New England states together have twenty five of the 134 cities, or almost one sixth, and New York alone has eighteen, and New England forty-three, or almost one third. Washington is the twelfth city in the union. There are only twenty-five cities numbering over 50,000 inhabitants each.

Do but half of what you can and you will be surprised at the result of your dilligence.

AN INDIAN JUGGLER.

While the tom tom was beating and the pipes playing, the juggler singing all the time in low accents, smoothed a place in the gravel three or four yards about us. Having prepared a bed for the plant to grow in, he took a basket and placed it over the prepared place, covering this with a thin blanket. The man himself did not wear a thread of clothing, except a strip around his loins. The time seemed now to have come for the detective's eye. So just as he was becoming more earnest in his song, and while tom tom beat and the pipes shrilled more loudly, I stepped forward with becoming dignity, and begged him to bring the basket and its covering over to me. He cheerfully complied, and I carefully examined the cloth covering, which was thin, almost transparent, and certainly had nothing concealed in it. I then fixed my eyes upon his strip of clothing with such intensity that it was not possible it could have been touched without discovery, and bade him go on, feeling sure that the trick could not succeed. Sitting down the basket singing and smiling as he did so; then lifting the basket off the ground, and behold, a green plant about a foot high! Satisfied with our applause he went on with his incantations. After having sat a little to give his plant time to grow, he again lifted his basket, and the plant was now two feet high. He asked us to wait a little longer and we might taste the fruit! But on being assured by those who saw the trick performed before, that the result would be obtained, I confessed myself "done," without the slightest notion of the how. I examined the ground, and found it unturned. Apparently delighted with my surprise the juggler stood up laughing, when one of his companions chucked a pebble to him, which he put into his mouth; immediately the same companion, walking backwards, drew forth a cord of silk, twenty yards or so in length; after which the juggler, with his hands behind him, threw forth from his mouth two decanter stoppers, two shells, a spinning top, a stone and several other things, followed by a long jet of fire. If the wise reader regrets so much space being taken up by such a story, let him pass it to his children, foolish as myself, will be glad to read it.—*Peeps at the Far West, by Norman Mcleod, D. D.*

The concussion of the air, it is asserted, will drive off insects that prey upon fruit trees, and will also improve the atmosphere so as to clear away the malarious vapors that produce fevers. At a recent meeting of prominent citizens of Jacksonville, Florida, a gentleman living in the vicinity stated that the blowing of the whistle of the locomotives running on a new railroad passing through his orchard had driven off the "curculio." He was led to believe that this disappearance had been caused by the shrill noise of the whistle, and the jarring of the air, and to satisfy himself as to the correctness of this theory he placed two pounds of powder in the hollow of a live oak stump in the immediate vicinity of peach and plum trees which the curculio threatened to destroy entirely. The powder was fired off on a calm night, and the insects, it is stated, disappeared at once and the trees and vines subsequently exhibited a marvelous growth. It is argued, also, that concussion of the air will destroy all animalculæ and render sickly localities perfectly healthy. As a proof of the latter theory, it is stated that during the rebellion, in consequence of the repeated discharges of gunpowder, neither the yellow fever or any other epidemic disease prevailed in our Southern cities. Other illustrations are also given of this theory, and the effects of thunder in sickly seasons are cited as supporting the above views. It was also stated that during yellow fever epidemics few thunder storms occur.

Subserviency to the party is the canker of the press. An editor whose sheet is mortgaged to the state convention, or whose conscience is lodged in an envelope and filed away in a pigeon hole of the White House, has abdicted journalism. Generally, too, when a journalist shuts the door of his office behind him to take a seat in Congress, his pure flame of first love for his profession is gone—he has slighted his wife for a mistress. Of course journalists have as much eligibility of official station as other men and more knowledge of its requirements than many. But a man can not be at the same time a judge and an advocate, neither can he be an editor and a politician. Imagine Mr. Gladstone to be at the same time the Premier of England and the editor of the London Times. What would be the value of that journal's opinion, of that statesman's policy.—*Golden Age.*

'I'm not used to begging,' said a little girl to a lady of whom she had asked alms, ''cause only two weeks ago my father was a merchant!' 'Why, child, how could you be reduced to poverty so soon?' 'My father took a bad two dollar bill at his peanut stand, and it ruined him,' sobbed the child.

WHAT THE DEMOCRACY WANTS AND WHAT IT NEEDS.

An exchange has figured up the following to be the present wants and needs of the Democratic party:

The wants and needs of the modern democracy may be summed up as follows:

It wants power.
It needs patriotism.
It wants free trade.
It needs home industry.
It wants to be trusted.
It needs to be distrusted.
It wants more ku-klux.
It needs more hangmen.
It want to repudiate.
It needs to be repudiated.
It wants a new departure.
It needs a new conscience.
It wants more repeaters at elections.
It needs more honesty at the ballot box.
It wants to restore the dead past.
It needs to appreciate the living present.
It wants to govern the country.
It needs to be governed to save the country.
It wants ignorant and submissive voters.
It needs educated and independent thinkers.
It wants unlimited control of public affairs through the supremacy of states.
It needs practical and cheerful submission to the supreme law and constitution of the United States.
It wants the disfranchisement and re-enslavement of the negro.
It needs the enfranchisement of its followers, from the ignorance and tyranny of oligarchcial leaders.
It wants to secure all these by a victory in 1871.
It needs and shall secure an overwhelming defeat.

IMPORTANT INVENTION.—A citizen of Wisconsin has invented an automatic machine that will cut, bind, and deliver grain in a bundle. The machine was tried last season on six different farms, in order to test its adaptability to rough, smooth, sidehill and level ground, and also to different lengths of grain, whether grassy, tangled or well cultivated. The result established the fact that the work could be perfectly performed, and the per cent. of failures averaged five in the hundred, the machine having cut and bound one hundred thousand bundles. This year, the same machine, with improvements, has again been on trial, and the result has been highly satisfactory. It was put in operation in a field of oats of about thirty-five acres: The grain varied in height from six feet in the most fertile to ten inches in the poorest parts, and was cut and bound from the size of a man's body to the size of his arm, and in some cases mere wisps, owing to the shortness of the straw. The buts were laid as smoothly as cut across with a knife, and the per cent. of failures was insignificant. Subsequently the machine was placed in a field of wheat, which it cut and bound at the rate of fourteen acres a day. The wire bands used in tying up the bundles are said to answer the purpose well, and cost only thirty cents an acre.

An interesting object is the chronopher, or instrument from which all England is supplied with the correct time. Sixteen of the most important cities in the kingdom are in direct communication with this instrument, which is itself in direct communication with the observatory at Greenwich. At 9,58 o'clock every morning, all other work is suspended, in order that there may be no interferance with what is called the time circuit, which precisely at the striking of the clock, flashes the intelligence to the sixteen stations with which it is in communication. And not merely at these large towns but at every postoffice throughout the kingdom, the clerks, at 9:58 are on the lookout for the signal which is being passed along their line, and the clocks are adjusted accordingly. Messrs Bent, Benson, and all the principal watchmakers at London receive their time every hour from this chronopher. Time guns at Newcastle and Shields are also fired at 1 p. m., by batteries attached to the chronopher, the clock attached to which is regulated for accuracy to the twentieth part of a second.

To make a cistern of forty barrels dig six and a half feet in diameter and seven feet deep. Wall with hard bricks or bats, laid in good lime or sand mortar; about 800 brick will lay the wall (one barrel of best cement will make a cistern of sixty barrels), mix two fifths cement and three fifths clean, sharp sand (not too fine), mix as you use the mortar, and not let it harden until it is on the wall. Apply two coats with the trowel, and finish up with the whitewash brush, using clear cement about the consistency of brick whitewash. This finish should be put on immediately after applying the last coat. Brush down as smoothly as a stone jar. Finish the wall before you put in the bottom, and be careful not to crack the cement after the mortar sets. A good workman should thoroughly understand his business.

CURIOUS FACTS ABOUT WATER.

The extent which water mingles with bodies apparently the most solid is very wonderful. The glittering opal, which beauty wears as an ornament, is only flint and water. Of every 1,200 tons of earth which every land holder has in his estate, 400 are water. The snow capped summits of Snowdon and Ben Nevis have many million tons of water in a solidified form. In every plaster of Paris statue which an Italian carries through the streets for sale, there is one pound of water to every four pounds of chalk. The air we breathe contains five grains of water of each cubic foot of its bulk. The potatoes and turnips which are boiled for our dinner, have; in their raw state, the one 75 per cent, and the other 90 per cent, water. If a man weighing ten stone was squeezed in a hydraulic press, seven and a half stone of water would run ont, and only two and a half dry residue matter remain. A man is, chemically speaking, 45 pounds of carbon and nitrogen, diffused through five and a half pails-ful of water. In plants we find water mingling no less wonderfully. A sunflower evaporates one and a half pints of water a day, and a cabbage about the same quantity. A wheat plant exhales, 172 days, about 100,000 grains of water. An acre of growing wheat on this calculation, draws and passes out about ten tons of water per day. The sap of plants is the medium through which this mass of fluid is conveyed. It forms a delicate pump, up which the watery particles run with the rapidity of a swift stream. By the action of the sap, various properties may be communicated to the plant. Timber in France is, for instance, dyed by various colors being mixed with water, and sprinkled over the root of the tree. Dahlias are also colored by a similar process.

KILLING PROHIBITION.

Prohibition is in the habit of being killed about as often as anti-slavery was. The best newspapers, such as the Boston Advertiser and Post used to kill anti slavery all sorts of ways, by prediction and prophecy—dignified and contemptable silence, travesty, consumptive pathology, death ded last words, dying groans, and final struggle. The "respectable" killed it daily,—the other papers oftener. But it always resurrected. Now the puppets of the show on Boston Common more surely come to life again, just as good as new.

Did the Advertiser or Post lie? Not a bit of it. Gentlemen never lie. It was only professional routine practice. It was only sustaining their paper and maintaining their position.

The same class of papers now sustain the liquor traffic. They kill prohibition now, as often as they killed anti slavery then, and with the same weapons. That used by Sampson, according to primitive use of the weapon, needed a downright blow. Now, it kills at any angle, predictional, inferential and historical.

We converted the whole tribe once. We can do it again. Words can never convert an editor, or a newspaper writer.

They fought for slavery till we brought in the bread and argument. As soon as the anti slavery men carried towns, counties, cities and States, and could give the most patronage, the whole tribe began to see the point. What wry faces some of them, the Advertiser, for example, made while we were pulling them up by the ears!

They were hardly voluntary tools of slavery then. They are hardly voluntary tools of the liquor traffic now.—*Boston News.*

It is hard to believe that such an ugly, bad smelling weed as dog fennel could be made palatable for the horse; but here is what a writer says on the subject:

"There is a wild weed, known as dog fennel, that grows on almost everybody's land and on all ground turned out to rest and regain strength, from having been long in constant cultivation. There is enough of this weed growing in the suburbs of Memphis, if cut, cured and baled, to make hundreds of bales. Nothing will touch it in its green state, and consequently it is looked upon by the people generally as a useless growth and a nuisance. This weed, when cut, cured, and salted, is an elegant feed for horses, and they are very fond of it. It contains great substance, and is not only food but a good tonic. It is known to the medical fraternity as the wild camomile, and it is said that tea from it is one of the best remedies for flux. Let every farmer cut his dog fennel, cure it, sprinkle it with salt, feed his horses on it, and thereby save and keep hundreds of dollars at home heretofore paid for feed brought from other states.

VIBRATION OF HIGH TOWERS.—The following illustration, says Professor Henry, of the vibratory movement of matter is attested by Professor Horsford, of the United States.—The top of the high tower which constitutes the Bunker Hill monument, inclines towards the west in the morning, and the north at midnight, and towards the east in the afternoon. These movements are due to the expanding influence of the sun as it warms, in succession, the different sides of the structure. A similar but more marked effect is produced on the dome of the capital at Washington, as indicated by the apparent motion of the bob of a long plum line fastened to the under side of the roof of the rotunda, and extending to the pavement beneath. This bob describes daily an elipsoidal curve, of which the longer diameter is 4 or 5 inches in length. By molecular actions of this kind, Time, the slow but sure destroyer, levels to the ground the loftiest monument of human pride.

Japan is nearly civilized. Defaulters are the latest evidences of progress.

New Railway Through Massillon!

Opening a New Route to the North and Northwest by July 1st, 1872.

To Connect with the Pan Handle in Two Years!

A PROMINENT CLEVELAND CAPITALIST TAKES THE CONTRACT FOR THE ENTIRE WORK!

The meeting of the directors of the Lake Shore and Tuscarawas Valley Railway Company on Wednesday last, at the American Hotel, was one of the most important events in the history of this city. For more than three years past various projects have been entertained by the citizens of Massillon, Seville, Medina, Grafton, Berea, Cleveland and Toledo, in the way of getting increased railway facilities down the Tuscarawas Valley, which should also be made available for some of the places named. Mass meetings have been held, speeches have been made, and a vast amount of eloquence expended, which produced little else than a "lively interest." Various plans have been suggested, but until the forming of the Lake Shore and Tuscarawas Valley Railway company, success was in the distance, and only "lent enchantment to the view."

The formation of that company, however, opened the way to success, and when it had a local habitation and a name its success was certain. The stock being all subscribed that was deemed necessary to begin, the Massillon meeting of the board of directors was the occasion for giving shape to the plans of the company, and rounding them into form. The following gentlemen were present as members of the board: Hon. W. S. Streator, president; J. F. Card, James Mason, and Selah Chamberlin, of Cleveland; Thomas Moore, of New Philadelphia; Clement Russell and Edwin Bayliss, of Massillon; E. G. Loomis, of Wadsworth; Hon. Mess. Harmont, of Dover, and Chapman, of Navarre; only one member, H. M. Claflen, of Cleveland, being absent. A fact which fully shows the interest felt in this last successful effort to open a new railway in the beautiful valley of the Tuscarawas.

In addition to the gentlemen named, we noticed Gen. Warner, of Marietta, and prominent citizens representing all the towns on almost all the routes from Uhrichsville to Grafton.

The meeting was called to order by the president at 2:30, p. m, and Hon R. B. Dennis, of Cleveland, chosen secretary pro tem.—the secretary being absent. Hon. James Mason, of Cleveland, presented the following guarantee of business for the road, which insures its success, financially, beyond peradventure.

In consideration that the Lake Shore and Tuscarawas Valley Railway Co. will construct a railroad with the requisite amount of rolling stock, and will operate the same within two years from date, from Grafton, Lorain County, Ohio, via. Massillon, to some point on the Cincinnati and St Louis railway, we, the undersigned, owning property on the line of said Lake Shore and Tuscarawas Valley Railway, hereby covenant and agree with the said L. S. & T. V. R. W. Co., that we will for the period of eight years from the time said railroad is opened through its entire length, furnish upon said railroad, (if provided with cars and suitable yard and dock facilities at Cleveland for the purpose) the number of car loads of freight of ten tons each, daily except Sundays, for transportation from the places set opposite our respective names to and over the line of said railway; that is to say we will furnish freight which shall be equivalent in amount of freight paid therefor to the number designated of cars of coal, it being understood that the rate charged shall not exceed one and three-fourths cents per ton per mile from the place of shipment to Grafton, Elyria, Berea, or Cleveland; also that the rates between stations shall be reasonable; also that reasonable notice shall be given to the railway company for a supply of cars.

It is stipulated that the performance of this agreement shall be satisfactorily secured, if demanded by said Lake Shore and Tuscarawas Valley Railway Co., by each of the undersigned for himself. It is also understood that in event of strikes among miners, or accident of any kind by which we or any of us may be prevented from furnishing our quota of freight, whether from inability to find a market or any cause, that the deficiency from time to time may be supplied at any time reasonably through the year.

This agreement shall be binding so soon as said railroad shall be completed to Massillon, upon all parties hereto whose places for shipping freight are at Massillon, or between that point and Grafton, and upon all other parties as soon as the railroad is opened through to their places of shipment.

It is also further understood and agreed that it is the intention of the parties hereto, to secure to said railway company freight northward bound, equivalent to an average of one hundred car loads of freight, of ten tons each per day, over all such portion of the railroad as shall be opened, at an average rate of not less than one and three fourths cents per ton per mile.

It is further stipulated by the parties hereto that they shall have the option to furnish freight northward bound to the amount of seventy five car loads per day, at an average of two cents per ton per mile, instead of one hundred car loads at one and three fourth cents per ton per mile, as hereinbefore provided, (Signed)

On motion of Mr. Card the above guarantee was accepted.

BY LAWS.

Mr. Mason presented an elaborate and carefully prepared code of By Laws which was adopted. In the code it is provided that the annual meeting of the stockholders shall be held on the second Wednesday in July.

FINANCES.

On motion of Mr. Card it was ordered that five dollars on each share of the capital stock subscribed in the counties of Cuyahoga and Stark, be called for on the first day of September, and that the balance of the stock subscribed in those two counties, be paid in monthly installments of ten per centum; those in Cuyahoga to pay to S. T. Everett, treasurer of the company, at the banking house of Everett, Weddell & Co., and those in Stark to S. Hunt, Cashier of the First National Bank, in this city. No portion of the remainder of the stock subscribed was called for, for the reason that much of it is fettered by conditions that may or may not be complied with. Our Medina friends, for instance, subscribed $50,000 to be paid on the laying of the track through their village. They feel that they have been isolated long enough, and mean to "make a dead sure thing" this time.

The business of the meeting being about concluded, his honor the president, made a statement of the condition of the work and the company.

There had, said Mr. Streator, been a great deal of difficulty in making a satisfactory arrangement with the Cleveland, Columbus, and Cincinnati and Indianapolis and Lake Shore and Michigan Southern railway companies, in regard to the use of their tracks, for terminal facilities at Cleveland and it was for some time a question whether connection should be made at Berea or Grafton.

It was found that no arrangement that would answer at all could be made at Berea with either of these companies, as the distance was so short to Cleveland—twelve miles—that the small pro rata of earning would not pay. But with twenty five miles of their track used from Grafton and Elyria, an arrangement could be made and was made, entirely satisfactory to all parties, and believed to be advantageous in the highest degree to the Lake Shore & Tuscarawas Valley Company. To the latter is secured the use of all the terminal facilities in Cleveland—passenger depot, freight houses, coal houses, chutes, &c.—to obtain sites for and build which would now cost hundreds of thousands of dollars. The Columbus and Lake Shore companies would also furnish their pro rata of rolling stock for the new road. These arrangements would save a very large outlay, and he thought they would be worth, in a term of years, millions of dollars to the new company. In addition to this the Columbus and Lake Shore companies agreed to give a guarantee that would it was confidently believed, greatly enhance the market value of the Lake Shore and Tuscarawas railway company's bonds.

These, he said, were the main reasons that led the officers of the company to intersect the other roads at Grafton instead of Berea. Of course it was an utter impossibility to please all, but he believed they had done the very best that could be done, and the arrangements made assured the early completion of the road. The distance by the way of Grafton was but four miles greater than by Berea and if the increased grades and curvatures by the latter route were taken into the account there is no difference. With the same power a considerably greater tonnage could be a transported over the Grafton route, from its superior topographical advantages.

A BIG CONTRACT.

The president stated that a contract had been make with Selah Chamberlain, of Cleveland, for the entire construction of the railway, including road beds, superstructure, water tanks, turntables, buildings, etc, and rolling stock to the amount of two thousand dollars per mile, from Elyria to the intersection with the Panhandle road, a distance of ninety two miles. The contract price was three million, three hundred and fifty thousand dollars, of which three hundred and fifty thousand dollars was payable in cash and three million in the securities, stock and bonds, of the company. The road was to be completed to Massillon by July 1st, 1872, and to its southern terminus within two years from date. The cost per mile, under the contract, would be $34,413.

The members of the Board express their entire satisfaction with the arrangements that had been made, and adopted resolutions ratifying both the contract with Mr. Chamberlain, and the agreement with other railroad companies. No other business arising, the Board adjourned, subject to the call of the president.

PROGRESS OF THE WORK.

D. Streator has just been over the line from Grafton to Massillon, and from him we learn that every thing is progressing in the most favorable manner. Work was actually commenced at Grafton (from which point to Medina the old graded road bed will be used) last week, and sixty men and eight teams are now engaged in preparing for the laying of the track. Much difficulty is experienced in procuring laborers, but the force will be increased as speedily as possible and the work pushed this fall with the utmost vigor.

Three thousand tons of iron have been purchased. It is known as the "Gest iron," being the best English manufacture, weighing fifty six pounds to the yard and costing fifty seven and a half dollars in gold per ton. It will require eighty eight tons per mile, the amount purchased being sufficient for about thirty five miles of the track. Notice was received two or three days ago that the iron had commenced to arrive at Buffalo, and by this time the advance has probably reached Cleveland. It will be immediately forwarded to Grafton and the laying of track will begin at once. Ties for thirty five miles have been contracted for: it is expected that the road will be entirely finished and the cars running to Medina, fourteen miles, in October. The route from that place will be to Seville, thence down Chippewa Creek to its mouth, and down the Tuscarawas Valley to Massillon.

SOUTH OF MASSILLON.

At the close of the meeting on Wednesday the president and several of the directors left for a three days cruise down the valley, to fully determine upon the location of the line southward, and the point at which intersection will be made with the Pan Handle road. There are two or three routes and termini proposed. All offer liberal subscription of stock and guarantees of business, and the people along each are working like beavers to secure the road. It will soon be decided which is the successful competitor. The building of short branches to two or three points will undoubtedly be found necessary at no distant day.

ANOTHER ROAD BEING BUILT

The long projected road known as the Marietta and Pittsburgh is now in active course of construction from Marietta northward. General Warner, representing that road, was present at the meeting. He states that in two weeks the road will be finished and the cars running to Coldwell, thirty five miles north of Marietta. The stock along the line has nearly all been subscribed and the work will be prosecuted vigorously. It will be entirely finished in two years, connecting with the southern terminus of the Lake Shore and Tuscarawas Valley road, and also with the Pan Handle for Pittsburgh. This will connect Cleveland by a nearly air line route with Marrietta, the head of low water navigation on the Ohio. The line will be two hundred and fifteen miles in length. Along one hundred and twenty five miles of this are inexhaustible deposits of coal and "black band" iron ore. It is stated that in point of mineral wealth this line will be unequaled by any other in the world. It will open up to Cleveland the trade of a vast, rich and populous district hitherto practically inaccessible. There can be little doubt that the Lake Shore & Tuscarawas Valley road, with its fortunate connections, will rapidly advance to one of the very best paying roads in the state. The residents of the Valley are jubilant over the prospect of a direct communication with Cleveland, while the business interests of the latter are not less to be congratulated upon the speedy success of this enterprise.

We are indebted to the Cleveland Herald for most of the foregoing report which was carefully prepared by Mr. Hinman its reporter who was present at the meeting, as was Mr. Folger of this city, the local correspondent of the Cincinnati Gazette. We cannot dismiss the subject without according to citizen Clement Russell the merit of having taken hold of this enterprise at its commencement and steadily persevered in giving it the aid of his personal influence and ample means, until he has succeeded in seeing his favorite project placed on a firm foundation, and its success assured. We congratulate the citizens of Massillon upon the results of a masterly inactivity so far as the great eastern and western routes are concerned.

Killinger & Co are now manufacturing a beautiful and appropriately devised iron fence, constructed of cast iron, which the G. A. R. post of this place will put in the cemetery to surround the lot in which to bury their dead.

A GREAT MEDICAL DISCOVERY.

MILLIONS Bear Testimony to the Wonderful Curative Effects of DR. WALKER'S CALIFORNIA

VINEGAR BITTERS

J. WALKER Proprietor. R. H. McDONALD & Co., Druggists and Gen. Ag'ts, San Francisco, Cal., and 32 and 34 Commerce St., N.Y.

Vinegar Bitters are not a vile **Fancy Drink,** Made of **Poor Rum Whiskey, Proof Spirits and Refuse Liquors** doctored, spiced and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the Native Roots and Herbs of California, free **from all Alcoholic Stimulants.** They are the **GREAT BLOOD PURIFIER and A LIFE GIVING PRINCIPLE,** a perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. No person can take these Bitters according to directions and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

They are a Gentle Purgative as well as a Tonic, possessing also, the peculiar merit of acting as a powerful agent in relieving Congestion or inflammation of the Liver, and all the Visceral Organs.

FOR FEMALE COMPLAINTS, whether in young or old, married or single, at the dawn of womanhood or at the turn of life, these Tonic Bitters have no equal.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these **Bitters** have been most successful. **Such Diseases** are caused by **Vitiated Blood,** which is generally produced by derangement of the **Digestive Organs.**

DYSPEPSIA OR INDIGESTION, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia.

They invigorate the Stomach and stimulate the torpid liver and bowels, which render them of unequalled efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

FOR SKIN DISEASES, Eruptions, Tetter, Salt Rheum, Blotches Spots, Pimples, Pustules, Boils, Carbuncles, Ring-Worms, Scald-Head, Sore Eyes, Erisipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effect.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions or Sores, cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure and the health of the system will follow.

PIN, TAPE, and other **WORMS,** lurking in the system of so many thousands, are effectually destroyed and removed. For full directions, read carefully the circular around each bottle, printed in four languages—English, German, French and Spanish.

What it has done What it is doing and what it means to do. Its power, its despotism, infallability, frauds, relics, miracles, idolatry, persecutions. Its hatred of our public schools and of civil and religious liberty, its horid wickedness, and its New York Plots.

A book that is wanted everywhere. We want agents to introduce it at once, and will pay them liberally. Zinegler, & McCurdy, 180 Race st. Cincinnati, O.

JURUBEBA

WHAT IS IT?

It is a sure and perfect remedy for all diseases of the liver and spleen, Enlargement or obstruction of intestines, urinary, uterine or abdominal organs, poverty or a want of blood, intermittent or remittent fevers, inflamation of the liver, dropsy, sluggish circulation of the blood, abscesses, tumors, jaundice, scrofula, dyspepsia, ague and fevers or their concomittants.

Dr. Wells having become aware of the extraordinary medicinal properties of the south American plant, called

JURUBEBA

sent a special commission to that country to procure it in its native purity, and having found its wonderful curative properties to even excell the anticipations formed by its great reputation, has concluded to offer it to the public, and is happy to state that he has perfected arrangements for a regular monthly supply of this wonderful plant. He has spent much time in experimenting and investigating as to the most efficient preparation from it, for popular use, and has for some time used in his own practice with most happy results the effectual medicine now presented to the public as

Dr Wells' Extract of Jurubeba.

And he confidently recommends it to every family as a household remedy which should be freely taken as a blood purifier in all derangements of the system and to animate and fortify all weak and lymphatic temperaments. John Q. Kellogg, Platt st. N. Y. Sole agent for the United States. Price one dollar per bottle Send for circular.

LOST

On Main street between Erie and East streets Saturday evening, a small gold brooch of half moon shape attached to a narrow velvet ribbon. The finder will recieve reward by leaving the above at the American Hotel.

FLAGS AT THE NEWS DEPOT.

Jacob Mauger is making a strong, plain, wrought iron fence, which is to surround a cemetery not far from town.

Mr. Holbyson, a prominent and wealthy citizen who lived near Lawrence, in this county, was buried on last Friday. He was a man of more than ordinary energy and force of character.

That portion of the Friends known as Hicksites, according to what the Journal say, held the largest yearly meeting at Salem that has been known for many years. It is represented as a pleasant reunion of many of the old antislavery friends, who gathered there to greet each other on the overthrow of the curse of slavery, against which all classes of earnest friends ever bore a consistent and faithful testimony. Prominent friends from N. York, Pennsylvania, Indiana, Ohio and other states were present It is represented as one of the most encouraging gatherings of that faith for many years.

Who that has seen a dangerous disease arrested by an able physician or a good medicine but takes both? Be it your family physician to whom you owe so many escapes from aches or ills, or Dr Ayer's inimitable remedies:—his Sarsaparilla that renewed your vitality or Cherry Pectoral that cured a painful cough, or his Ague Cure that expelled the freezing ague and burning fever from your blood. Who has been relieved by any of these agencies but feels grateful for them all?—Bangor Times.

Take Simmons' Liver Regulator regularly, enjoy good health yourself and give gratification to those about you.

You will have cause to bless the day you heard of Simmons' Liver Regulator.

Infants.—Much suffering to these tender little buds of the family might be allayed by using Mrs. Whitcomb's Syrup. See advertisement in another column.

A continuation of the answer to Progress does not appear this week in consequence of the sickness of the writer, who was unable to prepare the copy in time. He will have a place next week.

Our Episcopal friends were favored with the presence of a preacher last Sunday evening, Rev. Mr. Dean, who lives somewhere north of us. His discourse seemed to give satisfaction to the congregation in attendance.

Watermelons—or as dutch Peter used to call them fifty years ago, wotter williams—a very juicy article, are abundant in our markets, and not very expensive. The doctors say they possess great depurating properties, and are good to wash out the internals, but they make rather thin living, and no plan has been found to cook them better than nature's laboratory. People generally prefer them without salt.

Republican meetings will be addressed in West Brookfield on Friday evening the 8th inst., by Messrs. E. N. Johnson and G. E. Baldwin, and in East Greenville, on the 9th by J. J. Parker and A. C. Braden, Esqs, At Navarre, on the 9th, Judge Underhill, and Abner McKinley, Esq. At North Lawrence, on the 9th, Hon. A. C. Wales, Henry Wise and Ed. A. Lee. At Wilmot, on the 9th by Major W. McKinley and W. B. Higby, Esq.

Messrs. Allman, Grosse & Wetter, the enterprising gentlemen who succeed J. G. Warwick & Co. in the well known Wheat City Block, are beginning business on the right basis. They pay as they go, and ask others to do the same. It is the right way to carry on a store or any other branch of trade, for it saves a vast amount of after trouble. We hope the new firm will be as successful as they deserve, and there will be no danger of the word fail.

Bro. Rukenbrod, of the Salem Republican, has devised a new newspaper mailing apparatus, which is claimed to be an improvement over everything of the kind now in use. Simplicity and efficiency in operation, we understand, combine the advantages of this invention.

Mr. Case, a member of the legal profession, of Ashtabula county, came here one day last week with the idea of locating himself among us. Massillon has but few lawyers compared to many other places, and for this reason, as well as the thriving, active population, Mr. C. decided to hang out his shingle.

Mr. Case locates at Fulton.

The Driving Park Association, or at least the gentlemen having charge of its affairs, are making the necessary arrangements to carry out the object contemplated in originating it. As soon as possible the grounds, which lie a little east of town, on the Canton road, will be put in order, and the probability is, that during next month a fair of some description will be held there. It is a good place for holding large public meetings, parades, or any other gathering requiring considerable space, as it is not far from town, and a portion of the ground is shaded by a rich, luxurant growth of trees.

Mr. Davenport has encouraging orders, which continue to come in about as rapidly as he can fill them, for constructing iron bridges. He has just been sending some fine productions of his establishment to Indiana, where our friend, Mr. L. S. Hardy, has gone to superintend their erection,—a branch of the business for which he is well qualified, and in which he has had ample experience. One or perhaps two iron bridges are talked of being built in a short time across the canal.

Russell & Co. have orders for making a large number of freight cars, and are employing a considerable force of men for that purpose in their large establishment. As more railroads are coming here that branch of manufacture must necessarily increase, and we know of no better place than Russell & Co's for making them. There are so many reaper and mower makers over the country that the effect cannot be otherwise than to limit the production to each manufacturer—but Russell & Co. will always have enough to do, as the construction of separaters is a sort of specialty with them.

Mr. Greeley, principal editor of the Tribune, is now indicated by a tail to his name—Horace Greeley, LL. D. He makes no pretensions to this title, but the funny editors have tacked it to his plain name. Don't think he will feel stuck up about it.

In printing the proceedings of the Driving Park Association, last week, somehow the name of Mr. George Young, one of the most active members, who takes a deep interest in the project, was left out. Types, like other people, will make mistakes, but we make ours correct errors when pointed out.

As the moon is becoming scarce and shady the prospect is that our numerous lamp posts will soon be the beacons by which the nightly traveller can see his way along the streets.

Plows and scrapers have been cleaning off Mill street between Main and Tremont for the purpose of cindering and graveling.

Mr. Pennypacker, formerly of this place, but for the last six years a resident off Illinois, who is a skillful mechanic in saddlery mechanism, has returned to town and will occupy the Yost Bros. shop on Erie street, where he will carry on a special branch of the trade. Messrs. Yost take the third story, same building, for their hands, but will continue their business, as we understand it, in one of the lower rooms, where customers will call, and where they have been for several years.

Pursuant to notice previously given on Wednesday evening of last week, our citizens were favored with a visit and speeches from Gen. R. P. Buckland, of Sandusky, and Hon James Monroe, of Lorain county. The Massillon Silver Band gave a pleasant signal for the meeting by playing several favorite airs, from the balcony of the American Hotel, which was soon responded to by the gathering of a considerable crowd of our people Hon Arvine C. Wales presided, and introduced Gen Buckland, who took the stand, and for half an hour interested his hearers. In commencing his remarks he referred to the time at which he lived here, now about forty years ago, when this city was mostly covered by its native forests, and some of the ground marshy and uninhabitable. Having disposed of these reminiscences, to which many of our older citizens listened with earnest attention, the gentleman proceeded to speak, of the political issues of the day. Without going into details he confined himself principally to urging the necessity of integrity to the platform of the republican party, and the great principles for which so many thousands of good men went forth, fought, and died to maintain.

In introducing Prof. Monroe, Mr. Wales adverted to the time, 1843, when three young men from the eastern states came here as missionaries in behalf of liberty. His brief but pertinent recital of the days of 28 years ago, when slavery was rampant, and ruled the country with all the vigor of its tyrannical spirit, commanded the closest attention. Of course our young men know nothing of what then happened, excepting what they learn from others, but there are many of us who well remember the telling and eloquent speeches of these three young men—Monroe, White and Howard, and their earnest compeers, in the days when it needed backbone to be called and acknowledged an abolitionist. It is to the labors of this class of men that the great moral revolution in public sentiment, and the radical advancement our government has made politically in behalf of equal rights. Mr. Monroe, also, very pleasantly referred to some of the incidents which were connected with his first visit to this place, now now a quarter century, ago and which Mr. Wales in introducing him portrayed in such vigorous and telling style as to challenge the closest attention of all his audience. After these pleasing allusions to the olden time, Mr. M. proceeded to impress upon every republican voter the necessity of performing his duty faithfully at the coming election. Like his predecessor, Gen. Buckland, he referred to the democracy in respectful, gentlemanly terms, leaving out personalities and unpleasant allusions which have been so characteristic of many of the politicians of other times. In alluding to the new departure of the democracy, Mr. M. said that the republicans have done nothing so bad that a new departure was necessary for them. Indeed, we almost conclude that this excellent and able man is a stereotyped republican, not favoring the idea of making any advances. All that is good of the party should be perpetuated, but we think it should not be afraid of progressing. That was the great idea that made the party. The speech however had a good effect—it put everybody in a good humor.

The Guerriere, an American vessel, was last recently at sea in consequence of the drunkenness of those who had control. This statement appears in the New York Sun, and seems to be well founded. This is about the way in which bad whisky and its numerous cousins do things. It fools away ships, human life or even the property of nations with equal impunity.

Some of those wicked opponents of the democracy are just now so impertient as to keep alive that question, very familiar to the party, that is to say, Where is the white man's government? Especially is this ugly question up at this era of politics, when the world is informed of the fact, that at the democratic state convention hold last week in Old Virginia, in Richmond at that, negro delegates were admitted. Where is this thing to stop? Where is the white man's government?

THE NORTHERN OHIO FAIR.

In a few days this great Fair will open. Tens of thousands of articles that are useful and ornamental will be on exhibition. The live stock will embrace the most celebrated horses and cattle in the country. The trotting on the race course will be equal to that of any course in the country. The gallery of paintings will be one of the chief attractions, containing, as it will, some of the finest paintings in the country, valued at over $40,000. Extraordinary preparations have been made to give better accommodation to the crowd than was given last year. Dining facilities will be given for feeding 30,000 daily. Buildings have been erected since last year, giving 33,000 more square feet room for exhibition. In fact nothing has been left undone that could conduce to the comfort of visitors.

The board of directors, consisting of some of the first gentlemen of Cleveland, have been untiring in their endeavors to make the coming fair the largest and most complete ever held in the west Everything has been done to insure a pleasurable time to everybody, and everybody's wife and children who may visit the great exhibition, and gaze at the varied products of the farm; garden, vineyard, stock yard, poultry yard, manufactories, workshops, artists' studio, &c.

All who will take a vacation and visit this great agricultural, horticultural, mechanical, artistical and chemical exhibition, will go home wiser and better, and with a higher appreciation of the world at large, and man in particular.

See advertisement for particulars. Remember the trains carry at half fare, and another opportunity of visiting such a grand exhibition will not occur for twelve long months.

We have not room for all the appointments of republican meetings this week.

Our Salem neighbors have some controversy about changing the ancient Friends lot, on which the meeting house and cemetery are located to a park. Zadok Street protests against the measure on the ground that it would be highly improper to make a pleasure spot over the remains of many who have been buried there. Mr. S. quotes a law against such appropriation of burial grounds, unless certain conditions are complied with.

The presentation of the Color Guard on the stage, in the Opera House, last evening, by our amateur performers, was a most creditable success. A large audience testified their appreciation of the play by numerous enthusiastic demonstrations of applause. Mr. Wales commended the praiseworthy efforts of the members of Hart Post in thus pleasantly laboring to erect a permanent memento in behalf of their departed comrades, in a brief but most pertinent introductory speech. Let the building be crowded every night this week, for it is engaged for five nights. The tableaux were truly grand and highly appropriate.

Our soldiers boys are doing all they can to welcome their visiting comrades on next Friday, the day designated for their reunion. All things bid fair to render the occasion a grand success. Every body should bid them a hearty welcome, and give them to know that Massillon is as patriotic as ever—as in the days When the tocsin of war reverberated through the land.

The railroad meeting held at this place on the 30th ult was attended by a large number of gentlemen, who represent a vast amount of capital. To our friend R H Folger, Esq., we are indebted for a report of the transactions of the meeting, which appears in to-day's paper, and to which the reader is referred. Everything indicates activity, and prosperity is awaiting the people all along the line.

In consequence of the length of the proceedings of the railroad meeting a column of advertisements are crowded out. We expect to make that all right.

We have no marriages or deaths to record this week, but it is said there are several bornings.

EVERY BODY

GO TO SEE THE

THE STATE OF OHIO, County of Stark, } Court of common Pleas.

Julia A. Cornell, vs. Martha Heckman, George W. Heckman, Charles Heckman, Cora A. Heckman, & Lydia Heckman. } Petition for Partition.

The above named defendants minor heirs of Joseph Heckman, deceased, will take notice that the above named demandant demands partition of the following premises, to wit: Part of lots numbered 80 and 81, the boundaries of which are as follows: Beginning on the southwest corner of lot numbered 81, on the east line of Muskingum street, and running thence north on said east line one hundred and forty feet, to an alley; thence east on the south line of said alley, one hundred feet; thence south on a line parallel with said east line of Muskingum street; one hundred and forty feet to the north line of Charles street; thence west on the north line of said Charles street, to the place of beginning, one hundred feet; together with all the appurtenances thereof, and thereunto belonging, or in case said premises cannot be partitioned then; that such other and further proceedings be had as are authorized by law; and that said petition will be for hearing at the next term of said court; commencing Nov. 6th. A. D. 1871.

JULIA A. CORNELL,

COAL.

WHITE ASH COAL! We are prepared to furnish a prime article of the above by the car, boat load, or single ton. Lump or nut on call, at the lowest market price. Coal will be furnished to those doing their own hauling, at bank prices, with canal freight added. By this arrangement those in the city, as well as farmers having teams, can be supplied with a prime article at a low figure. Our coal has no equal for domestic purposes. Weighing of all kinds for customers done free of charge. McCUE & JACOBS.

The Massillon Hardware Store keeps an assortment of shelf and heavy hardware, and all of which was bought for cash. We sell as low as the lowest. Call and see for yourselves. KELLEY & BROWN, Erie street.

NOTICE:

Copartnership and Card!

Massillon, August 26th, 1871.—The undersigned have this day entered into a copartnership under the style of

Allman, Grosse & Wetter,

and will continue the

Dry Goods

and DRY GROCERY BUSINESS at the old stand of

J. G. Warwick & Co.,

Main street, west side, in Wheat City Block. The business will be conducted on the popular

CASH SYSTEM PLAN!

Cash will be paid for all produce. All goods will be purchased in the eastern markets at the very lowest cash rates, and sold to the trade at lowest

CASH CITY PRICES,

and for

CASH ONLY!

and we will endeavor to give full satisfaction to all our old and new friends and patrons and the public at large, and solicit their encouragement in our future enterprise of transacting business on a cash basis; and sustain us by giving us a liberal share of patronage. And in return for your favors we can only offer you

Profitable Bargains

that can only be given or obtained under the advantages of doing an exclusive and thorough cash business. With thanks for past favors while in the firm, and clerking for J. G. Warwick & Co., we are, Respectfully, ALLMAN, GROSSE & WETTER,

C B ALLMAN, G E GROSSE, J DAWETTER, } successors to J G Warwick & Co.,

Massillon, O., Aug. 31—426-tf

20 Acres Land for Sale.

The subscriber offers for sale 20 acres of land, located 3 miles east of Lawrence, near Lee & Stever's coal mines, and 1½ miles northwest of Brookfield. On the premises is a good dwelling house and other buildings. Also, orchard of choice fruits. Well fenced, good garden, excellent well of water. The place is in good condition. For terms call and see the subscriber on the premises. 426-4t JOHN PACKER.

NOTICE.

Dissolution of Co-partnership.

The firm heretofore existing under the style of J. G. Warwick & Co., has this day been dissolved by mutual consent It is therefore necessary that all persons indebted to said firm call at their old stand on or before the 15th day of Sept., 1871, and settle their accounts. Payment can be made to either of the undersigned,

JOHN G. WARWICK.
CARREL B. ALLMAN.

Exuberant Health

Is a blessing vouchsafed to few. Even those who have been favored by nature with strong constitutions and vigorous frames are apt to neglect the precautions necessary to preserve these precious endowments. Indeed, as a rule, the more healthy and robust a man is, the more liberties he is inclined to take with his own physique. It is some consolation to the naturally weak and feeble to know that they can be so invigorated and built up, by a proper use of the means which science has placed at their disposal, as to have a much better chance of long life, and exemptions from disease and pain, than the most athletic of their fellows who are foolish enough to suppose themselves invulnerable, and act accordingly.

It is not much to say more than half the people of the civilized world need an occasional tonic, to enable them to support the strain upon their bodies and minds, which the fast life of this restless age occasions. In fact, a pure, wholesome, unexciting tonic is the grand desideratum of the busy millions; and they have the article in Hostetter's stomach bitters. It is a staminal medicine, i. e. it imparts permanent strength to weak systems and invigorates delicate constitutions. Its reputation and its sales have steadily increased. Competitive preparations have been introduced ad libitum, and as far as the public is concerned, ad nauseum, in the hope of rivaling it; but they have all either perished in the attempt, or been left far in the rear. It has been the great medical success of the past century, and it is quite certain that no proprietary medicine in this country is as widely known, or as generally used.

Ten lightning presses running incessantly (Sundays excepted,) the whole year through, barely supply the demand for the illustrated Almanac, in which the nature and uses of the preparations are set forth, the circulation now being over eight millions a year.

Sold by Druggists and Dealers in Medicine everywhere.

Ayer's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and a grateful perfume.

Prepared by Dr. J. C. Ayer & Co.,

PRACTICAL AND ANALYTICAL CHEMISTS,

LOWELL, MASS.

PRICE $1.00.

Eee's Self Hand Cutter

Attachment to Thrashing Machines.

Patented April 25, 1871.

Notice is hereby given to parties owning Thrashing Machines, or having interest therein, that the above named Hand Cutter can be attached to every Thrashing Machine manufactured, whether old or new, at the cost of $5; an attachment sent to any point in the United States with full particulars how to attach, &c., by addressing

LEE, WILSON & CO.,
Du Quoin, Illinois.

What we claim and warrant is, 1st, dispensing with one man's labor from the most difficult part of the machine, and saving as above $1,50 to $2 per day. 2d, The machine cuts the bands and the feeder feeds with perfect ease, and in no danger whatever of having his hands cut, which occurs so often while feeding the machine the old way. For further particulars address

LEE, WILSON & CO.,
411 p Du Quoin, Illinois.

Innocence is like an umbrella—when once lost, we may never hope to see it back again.

Vermont's elections are hereafter to be held biennially. There will be no election in that state this year.

An old lady, writing to her son out west, warns him to beware of bilious saloons and bowel alleys.

A watering place correspondent says that where he is they distinguish between the tenor and base mosquitoes.

A man and his wife, who had not met for eight years, recently found each other in a Chicago police court, both charged with drunkenness.

The Shakers are organizing missions to the heathen, and have begun by sending an elder to London.

He will find himself in mistake, that either seeks for a friend in a palace, or tries him at a feast.

Some one feeling that actions are better than words, has said: "We read of the acts of the Apostles, but never of their resolution."

The circumstances of the world are so variable, that an irrevocable resolution is almost a synonymous term for a foolish one.

The minds of some people are like the pupil of the human eye, and contract themselves the more the stronger light there is shed upon them.

Kinder is the looking glass than the wine glass; for the former reveals our defect to ourselves only—the latter to our friends.

Some one suggests that the best way to train up a child in the way he should go is for the person to travel that way occasionally himself.

There is hope for Virginia. Its best papers are ridiculing the tournaments, and telling the young men to stop fooling and go to work.

A little boy, three years old, who has a brother of three months, gave a reason for the latter's good conduct—"Baby doesn't cry tears because he doesn't drink any water and he can't cry milk."

"Why, Uncle Johnny," said his friend, "can you afford to eat shad at 25 cents a pound?" "Mine Gott," said Uncle Johnny triumphantly, "I can put him in mine ice chest and keep him till he gets cheaber."

'It is the type of an eternal truth,' says John Ruskin, 'that the soul's armor is never well set to the heart unless a woman's hand has braced it, and it is only when she braces it loosely that honor of manhood fails."

A new made minister having occasion to marry a couple as his first official act, and there being quite an assemblage present, he determined to strike them dumb with awe, and so, in winding up, he said: 'I pronounce you man and wife, and the Lord have mercy on your sinful souls!'

A dyspeptic read that by sending a dollar by mail he would receive a cure for dyspepsia. He sent the money, and received a slip with the following printed on it: 'stop drinking and hoe in the garden.' The man was mad at first, then laughed, and finally went to hoeing, and stopped drinking, and is now as well as ever.

THE GERMAN CABLE.—Further details have been furnished regarding the new German Atlantic Cable. It is stated by private advices from Berlin, that a company has been organized with a capital of $750,000, and that operations will commence in September. The point of departure will, it is said, be the little Hanoverian seaport of Emden, on the North sea, situated nearly opposite the English port of Hull. While the Atlantic cable from Emden to England, and having one of the English Atlantic cables to connect with.

The velocity of electric waves through the Atlantic cables has been ascertained by Professor Gould to be from 7,000 to 8,000 miles per second. Telegraph wires upon poles in the air conduct the electric waves with velocity more than double this. It is a curious fact that the rapidity of the transmission increases with the distance between the wire and the earth, or with the height of support. The Journal des Telegraphes says that wires placed upon poles slightly elevated transmit signals with a velocity of 12,000 mills a second; and those at a considerable height give a velocity 16,000 to 50,000.

REMARKABLE CAVE.—There seems to be no end of wanders in California The latest is a remarkable cave near Calaveras, wherein columns and pilasters, ornamented at their capitals with volutes and modillions, at irregular intervals enlist the visitor's attention; while fine representations of tapestry, cornice and fresco work are engraved and plainly visable on the wall. Every form imaginable grouping hang suspended, presenting all the variegated colors of the rainbow, and brilliantly sparkle from the pale light of a candle like a thousand diamonds, while a like proportion of stalagmite underneath, with their sugarcoated surfaces, are constantly presented to view. Here and there, it is added, are carelessly piled bruised and broken fragments, of those appropriate emblems of infinite wisdom that have succombed to the normal destructive qualities of man.

May, 2d, 1871—tf

Dr. J. LONG,

Eclectic Physician,

Has located himself at Massillon, O., for the treatment of

Female & Chronic Diseases.

Office east of the Park, second door of Mr. Falke's new building.

All consultations and examinations of patients made free of charge.

Dr. Long examines and explains your disease without asking any questions. If he understands your case you know it, and cannot be deceived. If he cannot tell your disease, and how you feel without asking questions he does not consider himself competent to treat your case. This is the criterion to go by, and patients should not be satisfied with any other. This is the only direct and positive evidence of my ability as a scientific physician, and by this standard I am willing to be judged.

A proper diagnosis of local disease, without constitutional symptoms, that is, not affecting the system generally, must depend upon the judgment of both patient and physician.

Give Dr. Long a call, and satisfy yourselves whether he understands your cases sufficiently well to treat them successfully.

Dr. Long may be consulted in the German and English languages. Address letters,

JAMES LONG, M. D.,

371-1y Massillon, Ohio.

MONEY CANNOT BUY IT!
For Sight is Priceless.

The Diamond Glasses,

Manufactured by

J. E. Spencer & Co., N. Y.,

Which are now offered to the public, are pronounced by all the celebrated Opticians of the World to be the **Most Perfect.** Natural, Artificial help to the human eye ever known.

They are ground under their own supervision, from minute Crystal Pebbles, melted together, and derive their name, 'Diamond,' on account of their hardness and brilliancy.

THE SCIENTIFIC PRINCIPLE on which they are constructed brings the core or center of the lens directly in front of the eye, producing a clear and distinct vision, as in the natural, healthy sight, and preventing all unpleasant sensations, such as glimmering and wavering of sight, dizziness, &c, peculiar to all others in use.

They are Mounted in the Finest Manner in frames of the best quality, of all materials used for that purpose.

Their Finish and Durability cannot be surpassed.

CAUTION.—None genuine unless bearing their trade mark ◄► stamped on every frame. JOSEPH COLEMAN,

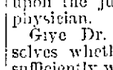

Jeweler and Optician, sole agent for Massillon, Ohio,

from whom they can, only, be obtained. ese goods are not supplied to peddlers at any price. 378–1y

TIME.

Go to COLEMAN'S and get the correct time, and look over his splendid stock o Gold and Silver Watches, Diamonds, and Rich Jewelry, Fancy Goods, &c.

Manhood; how Lost, how Restored.

Just published, a new edition of Dr. CULVERWELL'S Celebrated Essay on the radical cure, without medicine, of Spermatorrhœa, or Seminal weakness, involuntary Seminal Losses, Impotency, Mental and Physical Incapacity, Impediments to Marriage, etc.; also, Consumption, Epilepsy and Fits, induced by self indulgence or sexual extravagance.

Price in a sealed envelope only six cents.

The celebrated author, in this admirable essay, clearly demonstrates from a thirty years' successful practice that the alarming consequences of self abuse may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This lecture should be in the hands of every youth and every man in the land.

Sent under seal, in a plain envelope, to any address, postpaid on receipt of six cents or two post stamps.

Also, Dr. Culverwell,s "Marriage Guide," price 25 cents.

Address the publishers, CHAS. J. C. KLINE & CO., 127 Bowery street New York P. O. Box 4,586. 37 4

JAMES B. ESTEP

Asks attention to many special offerings in the Dry Goods line that will be sold

Strictly for Cash,

at the closest possible discount The losses through misplaced confidence, to any merchant doing a credit business, are numerous, and corrupts the integrity and solvency of an establishment, as protective tariffs operate as contagious disease impoverishes the body physical. 412tf

DR. AUGUSTUS SLEE

Treats all private diseases with great success Spermatorrhœa, or seminal weakness and impotency, caused by self abuse, etc—producing General Debility of the body, Indigestion, want of proper Manliness, Loss of Memory, Indolence, reducing the System so as to render Marriage unadvisable—Permanently Cured.

Long standing constitutional disease skillfully treated and cured.

Effects of Mercury Eradicated.

The doctor gives particular attention to Female complaints. Sterility, Ammenorrhœa, Menorrhagia, and all such diseases, causing annoyance and interfering with the general health and enjoyment of life, invariably removed.

Send for the doctor's medical pamphlet, treatise, in plain language, on veneral diseases, enabling the afflicted to understand their own complaints Free at office or sent securely sealed, for six cents.

Ample accomodations for patients from a distance at the house

Office hours from 9 A. M. to 8 P. M., Sundays excepted All communictions to be addressed DR AUGUSTUS SLEE,

264 Penn street, Pittsburg, Pa.

DR. WHITTIER

Continues to treat all private diseases, syphilis in all its forms, gonorrhœa, gleet, stricture, orchitis, and all urinary diseases, and the effects of mercury are completely eradicated; spermatorrhœa or seminal weakness and impotency, resulting from self abuse or other causes, and which produce some of the following effects, as blotches, bodily weakness, indigestion, consumption, aversion to society, unmanliness, dread of future events, loss of memory, indolence, nocturnal emissions, and finally so prostrating the sexual system as to render marriage unsatisfactory, and therefore imprudent, are permanently cured.

It is self evident that the physician who confines himself exclusively to the study of a certain class of diseases and treats thousands of cases every year must acquire a greater skill in that speciality than one in general practice.

The establishment, comprising ten ample rooms, is central. When it is not convenient to visit the city, the doctor's opinion can be obtained by giving a written statement of the case, and medicines can be sent by mail or express.

The doctor publishes a medical pamphlet of fifty pages that gives a full exposition of venereal and private diseases that can be had free at office or by mail, in sealed envelope, for two stamps. Every sentence contains instruction to the afflicted, and enabling them to determine the precise nature of their complaints.

Hours 9 a. m to 8 p. m. Sundays 12 m. to 2 p. m. Office, No. 296 Penn street, Pittsburg, Pa. 365-1y

Henry T. Helmbold's

COMPOUND FLUID

Extract Catawba

GRAPE PILLS.

Component Parts—Fluid Extract Rhubarb and Fluid Extract Catawba Grape Juice.

For Liver Complaints, Jaundice, Bilious Affections, Sick or Nervous Headache; Costiveness, etc. Purely vegetable containing no Mercury, Minerals or Deleterious drugs.

H

These pills are the most elightfully pleasant purgative, superseding castor oil, salts, magnetia, etc, There is nothing more acceptable to the stomach. They give tone and cause neither nausea nor griping pains. They are composed of the finest ingredients. After a few day's use of them, such an invigoration of the entire system takes place as to appear miraculous to the weak and enervated, whether arising from imprudence or disease. H. T. Helmbold's Compound Fluid Extract Catawba Grape Pills are not sugar coated, from the fact that sugar coated pills do not dissolve, but pass through the stomach without dissolving, consequently do not produce the desired effect. The Catawba Grape Pills, being pleasant in taste and odor, do not necessitate their being sugar coated, Price 50 cents per box.

E

Henry T. Helmbold's

Highly Concentrated Compound

Fluid Extract Sarsaparilla

Will radically exterminate from the system scrofula, syphilis, fever sores, ulcers sore eyes sore legs, sore mouth, sore head, bronchitis, skin diseases, salt rheum, cankers, runnings from the ear, white swellings tumors, cancerous affections, nodes, rickets, glandular swellings, night sweats, rash, dyspepsia, and all diseases that have been established in the system for years.

L

Being prepared expressly for the above complaints, its blood purifying propensities are greater than any other preparation of Sarsaparilla. It gives the complection a clear and healthy color, and restores the patient to a state of health and purity. And is the only reliable remedy for the cure of pains and swellings of the bones, ulcerations of the throat and legs, blotches, pimbles, erysipelas and all scaly eruptions of the skin, and beautifying the complexion. Price $1,50 per bottle.

M

Henry T. Helmbold's

CONCENTRATED

Fluid Extract Buchu,

The Great Diuretic, has cured every case of diabetes in which it has been given. Irritation of the neck of the bladder and inflamation of the kidneys, ulceration of the kidneys and bladder, retention of the urine, gravel, milky discharges, and for enfeebled and delicate constitutions of both sexes, attended with loss of memory, indisposition, weak nerves, trembling, pain in the back, hot hands, dryness of the skin, and a host of other symptoms. Used by persons from the ages of eighteen to twenty-five, and from thirty-five to fifty-five, or in the decline or change of life; after confinement or labor pains; bed wetting in children.

B

Helmbold's Extract Buchu is Diuretic and blood purifying, and cures diseases arising from dissipation, excess and imprudences in life, impurities of the blood, etc., supersedes copaiby in affections in which it is used, and syphilic affections—in these affections used in connection with Helmbold's rose wash.

Ladies, In many affections peculiar to ladies, the buchu is unequaled by any other remedy—as in chlorosis, irregularity, ulcerated state of the uterus, leucorrhœa or whites sterility, and for all complaints incident to the sex, whether arising from indiscretion or dissipation. It is prescribed by physicians and midwives for the enfeebled and delicate constitutions of both sexes, and all ages.

O

H. T. HELMBOLD'S EXTRACT BUCHU cures diseases arising from imprudences habits of dissipation, etc, in all their stages, at little expense, little or no change in diet, no inconvenience, and no exposure. It causes a frequent desire, and gives strength to urinate, thereby removing obstructions, preventing and curing strictures of the urethra, so frequent in this class of diseases.

Use Helmbold's Extract Buchu for all affections and diseases of the urinary organs, whether existing in male or female, from whatever cause originating and no matter c how long standing. Price $1,50 cents pe bottle.

L

HELMBOLD'S IMPROVED ROSE WASH cannot be surpassed as a face wash, and will be found the only specific remedy in every species of cutaneous affection. It speedily eradicates pimples, spots, indurations of the cutaneous membrane, etc., dispels redness and incipient inflamation, hives, rash, moth patches, dryness of the scalp or skin, frost bites, and all purposes for which salves and ointments are used. It is an excellent Lotion for diseases of a syphilitic nature, and as an injection for diseases of the urinary organs, arising from habits of dissipation, used in connection with the extracts Buchu, Sarsaparilla, and Catawba Grape Pills, in in such diseases as recommended cannot be surpassed. Price $1 per bottle.

D

Full and explicit directions accompanying the medicines. Evidence of the most responsible and reliable character furnished on application, with hundreds of thousands of living witnesses, and upward of 30,000 unsolicited certificates and recommendatory letters, many of which are from the highest sources, including eminent physicians, clergymen, statesmen, etc. The proprietor has never resorted to their publication in the newspapers; he does not do this from the fact that his articles rank as standard preparations, and do not need to be propped up by certificates.

H. T. Helmbold's Genuine Preparations.

Delivered to any address. Secure from observation. Established upward of twenty years. Sold by druggists everywhere. Address letters for information in confidence to Henry T. Helmbold, Druggist and Chemist.

Only depots: H. M. Helmbold's Drug and Chemical Warehouse, No. 594 Broadway, N. Y. or to H. T. Helmbold's Medical depot, 104, South Tenth st. Philadelphia, Pa.

Beware of counterfeits! Ask for Henry T. Helmbold's. Take no other. 381-1y
